Dspress Ltd, United States, 2004. Paperback. Book Condition: New. 233 x 160 mm. Language: English . Brand New Book ***** Print on Demand *****.The Internet continues to grow at a very rapid rate. Together with this growth there is an accompanying growth of the technologies on which it is based. These technologies make use of TCP/IP as their foundation. To start to make sense of all these interrelated systems it is important for today s business computer user to be aware of the technologies on which The Internet is based. This book introduces these topics and is aimed at the Internet user who wishes to understand the technologies on which much of today s business and recreational computing is based. This book provides a succinct overview of how it all works. It is not a comprehensive reference work. This book shows: . How email works. What is the Domain Name Service How The Internet finds computers. The problems facing network designers. The essentials of Business Computer Security. The use of mobile technologies (WAP, Bluetooth, Wireless Networks). The major issues facing home and business network users Kevin Sullivan Bob Denham are Microsoft and CISCO certified systems engineers. They have, jointly, more than 50 years experience in the design and implementation of a wide range of data networks. They regularly consult for many blue-chip companies and frequently present network design classes for a wide range of industries.
