### ***Reviews***

*The book is great and fantastic. It is written in straightforward words and phrases rather than difficult to understand. You won't really feel monotony at any time of your respective time (that's what catalogues are for regarding should you question me).*

Springer. Paperback. Book Condition: New. Paperback. 249 pages. Dimensions: 9.0in. x 6.2in. x 0.6in. The IUTAM Symposium on Discrete Structural Optimization was devoted to discuss optimization problems for which design variables may not be sought among continuous sets. Optimum sizing from lists of available profiles, segmentation; as well as allocation and number of supports, sensors or actuators, are good examples of such problems for which design variables may be chosen only from finite sets. The above problems are having not only important practical applications. They are also inspiring scientific research in the field of discrete applied mathematics. Among them are controlled enumeration methods, subgradient approach, genetic programming, multicriteria optimization, neural nets etc. Along with its tradition of promoting and supporting new important fields of research in mechanics and its application, General Assembly of IUTAM decided in 1990 to support the Symposium. It is worthy to note that this is the second IUTAM Symposium on structural optimization, organized in Poland. The first one was held in Warsaw twenty years ago and was organized by Professors Sawczuk and Mroz. It was devoted mostly to problems with continuous design variables. The Symposium which gathered 40 participants from 12 countries was sponsored by several institutions listed below. However support by IUTAM should be specially appreciated. It helped several scientists to contribute to the Symposium which other way wouldn't attend the meeting. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
