The user of the analysis must rely ou the judgment of the collector and the anah st that the specimen, both as to locality and size, correctly represents the rock mass, unless some reason appears to the contrary. It rarely happens that the analysis in itself gives any indication as to this point, at least in a decisive waA The special case of the analysis of the groundmass of a rock is, however, not uncommon, and may be briefly discussed. For the general purposes of petrography such analyses are of little use, and they have been excluded from the present collection. On the other hand, for the solution of certain special problems they may be of great value. It must be pointed out, however, that an essential adjunct to their use is a knowledge of...
