Excerpt: .B, is to the mass B which it receives, as the square root of the density of A to the square root of the density of B. --Problem 80. t Fill a jar half full of oxygen, and then cautiously fill it up with carbonic acid. Then remove the cork and introduce a suspended candle. It burns brilliantly in the upper stratum of oxygen, but is extinguished in the carbonic acid buluw, being kinilled again, as it is again drawn upwards into the oxygen. Hence eacs of difforcnt densities do not minyle rapidly with each other, at least, to any great extent. Hut, if the oxygen and carbonic acid bo left together for a considerable time, they gradually diffuse themselves through each other, part of the heavy carbonic acid rising, while a portion of the lighter oxygen descends. --Elements of Chcmistry, by Dr. D....
