

ICD-10-CM 2016 Snapshot Coding Cards: Multiple Specialties: Ophthalmology

ICD-10-CM Snapshot 2016		Ophthalmology			
Ophthalmology Coding Tip					
Many of the codes for eye disorders indicate laterality, specifying whether the condition affects the left eye, right eye or is bilateral. If no laterality code is provided, the condition is bilateral. Always indicate codes for the left and right eye. If the code is not bilateral, assign the code for the affected eye. Except where noted, the codes indicating the condition involve 2 (bilateral), 3 (right eye), 4 (left eye), or 5 (bilateral). For codes requiring a 9th character, the number of the 1 (first) digit indicates that an additional digit is needed.
