It is true that patients have come under the writer s care who have been frightfully burned with phenol, through the accidental breaking of a carboy, for instance. Yet no one ever thought of such patients as being liable to carbolic poisoning. Though it must be admitted that gangrene and all sorts of adverse happenings have occurred in the past when the strength of the commercial solution was somewhere about 2 and when bandaged fingers and toes were more or less bathed with carbolic wash (1 to 30), often to their very marked detriment. On the other hand, burns were treated with phenol--olive oil, 1 to 6, and trouble was rare indeed, if it ever appeared. But that corrosive strengths of phenol, those that destroyed tissue and thus built up their own retaining wall, that these ever...
